VHA TRAIN Course Catalog: Introduction

[VHA TRAIN](#) is a gateway into TRAIN National, the most comprehensive catalog of public health learning products. TRAIN is one of the most widely used learning management systems and is a free service of the Public Health Foundation. Access VA-approved and sponsored learning on Veteran health topics now! Also, [subscribe to specific topics of interest](#) to receive periodic VHA TRAIN eblasts and other news tailored to your area of interest.

Below is a list of current courses available through VHA TRAIN organized by topic and updated monthly:

MILITARY CULTURE

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Understanding the Context of Military Culture in Treating Veterans	The purpose of this series is to further educate non-VA providers about VA's policies, practices, expertise, standards and resources for treating Veterans. Sharing knowledge about VA's resources and providing educational opportunities about its policies, practices and standards affirms the synergy and uniformity between community and VA-based health care given to Veterans.	2 hours	1082781	2/17/2021
Military Culture in Primary Care	The purpose of this knowledge-based educational web course is to close the gap by providing specific information on the military culture and the screening tools that are available. Expiring soon!	1 hour	1068888	2/1/2020
Military Culture and Spiritual Health	The purpose of this knowledge-based educational web course is to close the gap by presenting a clinical round table to discuss the military as a unique culture that warrants awareness and understanding from spiritual leaders who care for and serve Servicemembers, Veterans, and their families. A panel of experts with various backgrounds to include the Department of Defense (DoD), Department of Veterans Affairs (VA), and civilian settings will provide an overview of the knowledge and skills needed to provide culturally-informed pastoral care with a focus on warrior ethos, the impact of deployment and combat, moral injury, spiritual growth as well as reintegration into civilian life. Evidence-based strategies to best engage military families will be reviewed along with expert opinions from chaplains with extensive experience in working with this population in DoD, VA, and community settings.	1 hour	1072794	8/15/2020

 OPIOIDS, ADDICTION, AND PAIN MANAGEMENT

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Opioid Overdose Education and Naloxone Distribution Training	This knowledge-based course is designed to train providers on opioid safety/overdose prevention and how to respond to an overdose with naloxone. The core curriculum will be presented in a web-based learning module with additional resources available for use after the training session. The tutorial will increase provider awareness of the need for opioid safety/overdose prevention, and describe national VA naloxone kits and how to use them.	1 hour	1087390	12/15/2020
Evidence-Based Tobacco Cessation Care in the VA Health Care System	The goal of this web-based series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This particular session will address evidence-based tobacco cessation care in VA.	2 hours	1086645	9/30/2022
Pain Management and the Opioid Safety Initiative in the Veterans Health Administration	The purpose of this series is to further educate non-VA providers about VA's policies, practices, expertise, standards and resources for treating Veterans. This particular session will discuss pain management and the opioid safety initiative in Veterans Health Administration.	2 hours	1083377	3/22/2022
Key Principles From the VA/DOD Clinical Practice Guideline for Opioid Therapy for Chronic Pain	The purpose of this knowledge-based video is to provide important information to members of health care teams that will assist them in delivering high-quality, evidence-based care. The use of opioids in the treatment of chronic pain has led to a public health crisis. This video will help DOD and VA health care teams better understand how to address chronic pain in their patients. The guideline has recommendations for treating chronic pain that are based on the latest evidence. As a result of using this guideline, patient satisfaction will improve and the health care teams will have an increased confidence in the care that they deliver.	1	1076029	10/13/2020
Community Care Provider Opioid Safety Initiative	The goal of this program is to build a collaborative effort between the VA and non-VA purchased care providers by promoting evidence-based management of Veterans with chronic	1 hour	1073710	8/31/2020

 OPIOIDS, ADDICTION, AND PAIN MANAGEMENT

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	pain, improving patient outcomes and decreasing incidence of complications in regards to opioid prescribing.			
Contraception Resources from the CDC: 2016 US MEC and SPR Updates	This knowledge-based webinar aims to inform VA staff on those guidelines available from the Center of Disease Control (CDC) to ensure access of contraception to women served by the VA. These guidelines will help providers counsel women, men and couples to use contraception safely, correctly and consistently and will also address common issues with contraceptive initiation and use.	1 hour	1070104	4/7/2020

 EPILEPSY

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Anti-Seizure Medications: A Changing Landscape	The VA Epilepsy Center of Excellence has determined that there is a knowledge gap throughout the system of a common understanding of changing landscapes of anti-seizure medications and epilepsy. This is a web-based training course on the concepts of that changing landscape. The purpose of this knowledge-based module is to provide pharmacists, physicians and non-physician health care providers with detailed information about anti-seizure medications (ASM) and how they are associated with epileptic and nonepileptic conditions. Key lessons within this course include a review of seizure types, comparison of anti-seizure medications, treatment and finding the right medication, and discontinuing ASMs.	1	1076882	4/15/2021
Recognizing Imitators of Epilepsy	The VA Epilepsy Center of Excellence has determined that there is a knowledge gap throughout the system of a common understanding of the imitators and mimickers of epilepsy. This is a web-based training course on imitators and mimickers of epilepsy. Key lessons to learn from this course include an introduction on the clinical approach to differential diagnosis of seizures, followed by more indepth discussion on psychogenic nonepileptic seizures, syncope and movement disorders that may imitate seizures, as	1 hour	1075698	12/8/2020

	well as other common imitators.			

 HEALTH DISPARITY AND HEALTH EQUITY

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Treating the Unique Health Care Needs of Veterans With Lesbian, Gay, Bisexual and Transgender	The goal of this live, web-based series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This particular session will address the unique health care needs of the lesbian, gay, bisexual and transgender community.	2 hours	1085486	6/15/2022
Casting the Health Equity Lens on Routine Check-up: Lucille F. 54	Optimizing patient-focused primary care related to routine check-ups.	1 hour	1067604	12/31/2020
Determinants of Health and Healthcare for All Employees	The purpose of this Decision Simulation is to provide an awareness of Veteran populations that are at risk for health disparities, the factors that put them at risk and what you can do within your area of influence to move toward attaining the highest level of health for our Veterans.	30 min	1067599	12/31/2020
Transgender: Masculinizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on masculinizing hormone therapy.	0.25 hour	1087996	10/25/2022
Transgender: Medical Evaluation for Masculinizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on medical evaluation for masculinizing hormone therapy.	0.25 hour	1087992	10/25/2022
Transgender: Medical Evaluation for Feminizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on medical evaluation for feminizing hormone therapy.	0.25 hour	1087993	10/25/2022
Transgender: Feminizing Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses on feminizing hormone therapy.	0.25 hour	1087995	10/25/2022
Transgender: Diagnosing Gender Dysphoria	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session	0.25 hour	1087990	10/25/2022

HEALTH DISPARITY AND HEALTH EQUITY

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	focuses on diagnosing gender dysphoria.			
Transgender: Assessment of Readiness and Consent for Hormone Therapy	This brief training is part of a series of programs on health care for transgender and gender-diverse Veterans. This session focuses assessment of readiness and consent for hormone therapy.	0.25 hour	1087994	10/25/2022

WAR RELATED ILLNESS/POST DEPLOYMENT HEALTH

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
War-Related Illness and Injury Study Center: Module 5 – Depleted Uranium and Toxic Embedded Fragments	This curriculum provides health care providers with knowledge about the current research on health effects in depleted uranium (DU)-exposed populations; information about enrolling Veterans with suspected DU exposure or toxic embedded fragments into VA registry programs; and guidance about the clinical approach to Veterans with embedded fragments.	1 hour	1087697	10/1/2022
War-Related Illness and Injury Study Center: Module 1: Assessing Deployment-Related Environmental Exposures	The War-Related Illness and Injury Study Center, a national program in VA's Post-Deployment Health Services, provides expertise to Veterans and providers on difficult to diagnose illnesses and environmental exposure concerns. Module 1: Assessing Deployment-Related Exposures, is the first in a series of post deployment health web-based training modules. It provides clinically relevant knowledge on the role of environmental exposures in Veteran health and the importance of addressing each patient's exposure concerns. In the following lessons, the course participant will learn how to conduct a deployment-related exposure assessment and determine whether an exposure could be associated with a Veteran's specific health concern. Expiring soon!	1.5 hours	1070234	3/1/2020
War-Related Illness and Injury Study Center: Module 2: Airborne Hazards	Chronic pain, illnesses and environmental exposure are the most frequently reported symptoms of Veterans seeking evaluation at the War-Related Illness and Injury Study Center. VA has a commitment to provide effective, evidence-based treatment for chronic pain, illnesses and	1 hour	1070422	3/1/2020

WAR RELATED ILLNESS/POST DEPLOYMENT HEALTH

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	environmental exposures during deployments, and to provide Veterans with the tools they need to self-manage pain, illness and respiratory issues. This web-based series will give evidence-based behavioral treatments for pain, illness and respiratory self-management. Expiring soon!			
War-Related Illness and Injury Study Center Module 3: Gulf War Illness	The purpose of this training is to provide health care providers with the knowledge needed to recognize, evaluate, manage and treat Gulf War Illness in Veterans. Providers will also become familiar with and be able to apply the VA-DOD clinical practice guideline for chronic multi-symptom illness to Gulf War illness.	1 hour	1074205	12/4/2020
War-Related Illnesses and Injury Study Center Module 4: Chronic Multisymptom Illness	This module offers health care professionals an opportunity to gain insight into chronic multi-symptom illness including the incidence in civilian and military populations, defining characteristics and the latest resources and management strategies to consider for care.	1.25 hours	1084440	3/28/2022
WRIISC-PDHS: Airborne Hazards Registry Updates and Outreach Activities	This webinar consists of an overview of the AHOBPR history, structure, goals, and challenges. The webinar will also cover the education and outreach activities supporting the AHOBPR. The webinar recorded on March 7, 2017 on "Research Findings and Clinical Applications" will explore the scientific research using AHOBPR and other data sources. Learners complete evaluation and post-test after training.	1 hour	1072391	8/1/2020
WRIISC-PDHS: Communicating With Veterans on Deployment-Related Exposure Issues	The objective of this program is to provide VA healthcare providers the knowledge needed to improve their communication with Veterans who have exposure related health concerns. At the end of the webinar, providers will be able to implement specific suggestions that will improve their risk communication. There is an evaluation and post-test for learner completion after the training.	1 hour	1072414	8/1/2020
WRIISC-PDHS: Pre-9/11 Deployment-Related Exposures	This program will provide information and share resources on Agent Orange and Gulf War Illness and also talk about other exposure issues of interest – mefloquine	1 hour	1072415	8/1/2020

 WAR RELATED ILLNESS/POST DEPLOYMENT HEALTH

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	that was used for malaria prophylaxis (which has some severe rare side effects) and cholangiocarcinoma (that can have an etiology of eating raw fish that had liver flukes in them). The purpose of this webinar is to educate providers on these four topics with special attention to Gulf War Illness that has a high prevalence among Veterans of that conflict. There is a test and evaluation for learner completion post-training.			
WRIISC-PDHS: Post-9/11 Deployment-Related Exposures	The purpose of this knowledge based webinar is to provide VA health care providers with an overview of sources of environmental exposure information, programs managed by Post-9/11 Era staff members, and a summary of the organization and mission of Post Deployment Health Services. While this webinar is not intended to furnish specific recommendations on clinical evaluation or management, it will address training gaps and teach providers how they can use this information to better understand Veterans' exposure concerns. Future webinars will explore in greater depth the status of the Airborne Hazards and Open Burn Pit Registry (AHOBPR). Learners complete evaluation and post-test after training.	1 hour	1072379	7/28/2020

 POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
PTSD 101: Practical Applications of Trauma-Focused Psychotherapies	The purpose of this knowledge-based course is to provide training by using clinical case examples to compare/contrast evidence-based trauma-focused psychotherapies.	1 hour	1088857	10/31/2022
PTSD 101: Prolonged Exposure Therapy: Effective Treatment for PTSD	The purpose of this knowledge-based course is to review the recent research on prolonged exposure (PE), provide a basic description of the treatment and to describe areas of future research for the team. By addressing a training practice gap, current PE providers/team members may improve their delivery of PE by learning about how recent research has informed new clinical recommendations for this treatment.	1 hour	1088863	11/30/2022

 POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
PTSD Consultation: Dissociation, Somatization and Other Challenging Presentations of PTSD	This live, virtual, knowledge-based course will help clinicians and health care teams to identify and understand dissociation and somatization presentations as trauma reactions within a PTSD case conceptualization framework. It will include reviewing clinical suggestions to support first-line, evidence-based PTSD treatment for Veterans with these challenging presentations.	1 hour	1088895	Live event to be held Jan. 15 only
PTSD 101: PTSD Treatment via TeleMental Health Technology	The purpose of this knowledge-based course is to provide an evidence-based approach to improving the current team processes of how TeleMental Health (TMH) technology, specifically home-based clinical video telehealth, can be used to address common barriers to care for Veterans with PTSD. By addressing a training practice gap, learners will be able to identify access and barriers to care for rural or remote Veterans with PTSD; describe how to offer evidenced-based PTSD treatment to rural Veterans via the telehealth technology team; and list clinical and research resources to help providers start a TMH program.	1 hour	1088865	9/30/2022
PTSD 101: Cognitive Processing Therapy	The purpose of this knowledge-based course is to provide an updated description of the various versions of cognitive processing therapy (CPT), as well as a summary of recent and future research for the team. By addressing a training practice gap, current CPT providers/team members may improve their delivery of CPT by learning about how recent research has informed new clinical recommendations for this treatment, particularly changes in various CPT modalities.	1 hour	1088864	10/31/2022
PTSD 101: Assessing and Reducing Violence Risk in Veterans With PTSD	The purpose of this knowledge-based course is to provide an evidence-based approach to improving the current team processes of clinical assessment and management of violence risk in Veterans with PTSD. By addressing a training practice gap, learners will be presented with a review of empirical literature associated with violence in Veterans with PTSD; a discussion on how psychosocial rehabilitation can help manage and reduce violence risk; and an overview of a	1 hour	1088734	9/30/2022

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	systematic approach to violence risk assessment to PTSD.			
Community Hospices – PTSD in Vietnam Veterans	This recorded, knowledge-based presentation will define PTSD, its causes and symptoms, and how this may manifest at the end of life. A number of treatment options for PTSD specific to those under hospice will be presented, as well as the similarities and differences between PTSD and other conditions.	1 hour	1086813	8/29/2022
Cognitive Processing Therapy for PTSD Enhanced Practice	The purpose of this knowledge-based educational web course is to provide knowledge and skills to implement CPT in order to be able to offer this therapy as an option for all Veterans seeking treatment for their PTSD symptoms. Learners will explore a number of scenarios using techniques to have Veterans work through Stuck Points and learning to Self-Challenge. These topics will help address training gaps as well as identify how the use of CPT for PTSD can help Veteran patients.	4 hours	1084993	6/30/2021
PTSD Assessment and Treatment	The purpose of this series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This session will discuss PTSD assessment and treatment .	2 hours	1084439	5/25/2022
PTSD 202: Skills Training in Affective and Interpersonal Regulation	This e-learning course is split into three sections, each containing a series of 15 to 20 minute sessions about skills training in affective and interpersonal regulation or STAIR, a trauma-informed, skills-focused treatment for PTSD and depression symptoms. Each session provides interactive, engaging and learner-centric training and resources for behavioral health clinicians learning to perform this therapy. The course relies heavily on a situational learning approach that involves scenarios, realistic examples, storytelling and characters. This approach takes several forms which is useful in expressing the nuances necessary to demonstrate behavioral, emotional and cognitive processes.	8 hours	1084691	9/30/2021

 POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
PTSD: From Neurobiology to Treatment	This presentation will highlight major advances in the neurobiology of PTSD and link these insights to novel therapeutic strategies. In doing so, this presentation will take a historical perspective and highlight advances from the 25 years of research within the Clinical Neuroscience Division of the National Center for PTSD of the U.S. Department of Veterans Affairs.	1 hour	1083779	9/1/2021
PTSD 101: The 2017 Revised Clinical Practice Guideline for PTSD: Recommendations for Psychotherapy	The purpose of this knowledge-based web course is to help clinicians become knowledgeable about the guideline recommendations and to assist them in providing care based on the latest evidence. This course will review the process by which the PTSD Clinical Practice Guideline was developed, clearly explain the recommendations related to psychotherapy and discuss the clinical implications for providers treating Veterans.	1 hour	1083765	1/31/2022
PTSD 101: The 2017 Revised Clinical Practice Guideline for PTSD: Recommendations for Medications	This course will review the process by which the PTSD Clinical Practice Guideline was developed, clearly explain the recommendations related to medications and discuss the clinical implications for providers treating Veterans.	1 hour	1083746	1/31/2022
PTSD 101: The 2017 Revised Clinical Practice Guideline for PTSD: How it Impacts Primary Care	This course will review the process by which the PTSD Clinical Practice Guideline was developed, clearly explain the recommendations related to primary care and discuss the clinical implications for providers treating Veterans.	1 hour	1083776	1/31/2022
Prescribing for Older Veterans With PTSD	This series of 10 courses are designed to address key areas of PTSD that have the most profound impact on Veterans and active duty Servicemembers.	1 hour	1065018	7/1/2021
Addressing Traumatic Guilt in PTSD Treatment	This course is part of the PTSD 101 education series, which is presented by experts in their field to increase provider knowledge related to the assessment and treatment issues of PTSD. The curriculum will be presented in a web-based learning module with additional resources available for use after the training session. After successfully completing the course, learners will be able to use the information to describe the	1 hour	1081427	7/1/2021

	relationship between guilt and trauma and explain how to assess traumatic guilt; illustrate how guilt can be addressed in prolonged exposure therapy; and discuss how guilt can be addressed in cognitive processing therapy.			
Assessment and Treatment of Sleep Problems in PTSD – Background	One of the most common complaints in those with PTSD is sleep disturbance. Problems with sleep may lead to further exacerbation of PTSD and other comorbid symptoms. Despite the growing recognition that sleep disturbances are one of the most common detrimental components of PTSD, many providers are not well educated on effective protocols for improving sleep. The goals of this course are to address this practice gap by providing information on both pharmacological and cognitive behavioral interventions for Veterans seeking help with their PTSD-related sleep problems, and to highlight the innovative ways the psychotherapy interventions can be implemented in groups and through telehealth technology.	1 hour	1058582	4/1/2021
Assessment and Treatment of Sleep Problems in PTSD - Pharmacological Treatments	One of the most common complaints of individuals with PTSD is sleep disturbance. Problems with sleep may lead to further exacerbation of PTSD and other comorbid symptoms. Despite the growing recognition that sleep disturbances are one of the most common detrimental components of PTSD, many providers are not well educated on effective protocols for improving sleep. The goals of this course are to address this practice gap by providing information on both pharmacological and cognitive behavioral interventions for Veterans seeking help with PTSD-related sleep problems, and highlighting the innovative ways the psychotherapy interventions can be implemented in groups and through telehealth technology.	1 hour	1058586	4/1/2021
PTSD 101: Treatment of Comorbid TBI and PTSD: Lessons Learned	The purpose of this knowledge-based educational web course is to close the training gap by providing a brief overview and findings from two recent treatment studies of Servicemembers/Veterans with	1 hour	1072853	7/28/2020

POST-TRAUMATIC STRESS DISORDER (PTSD)

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	comorbid TBI and PTSD: the Study of Cognitive Rehabilitation Effectiveness (SCORE) Cognitive Rehabilitation Trial versus Prolonged Exposure Treatment. The factors affecting treatment outcome will be examined including demographics, comorbidities, and treatment elements and dosage. Finally, the effectiveness of the two approaches will be compared with, and without, adjusting for treatment dosage. Learners complete the evaluation and post-test after training.			
PTSD 101: PTSD and Reintegration Challenges	Currently, the process of transitioning from a combat deployment to home can be challenging under any circumstance. When a service member returns from war with symptoms of Posttraumatic Stress Disorder (PTSD), this transition and the process of reintegration can be much more complicated. The purpose of this knowledge-based educational web course is to close the training gap by describing the stresses associated with different phases of the deployment cycle, with particular attention to the impact of PTSD on the process of reintegration following combat deployments. Learners will complete the evaluation and post-test after training.	1 hour	1072847	8/28/2020
PTSD 101: PTSD and Experiences of Sexual Harassment and Sexual Assault During Military	The purpose of this knowledge-based educational web course is to close the training gap by offering clinicians an opportunity to learn certain principles and tools to improve their clinical practice with Military Sexual Trauma survivors.	1 hour	1072850	8/28/2020

ETHICS IN HEALTH CARE/WHOLE HEALTH CARE/CULTURAL TRANSFORMATION

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
The Whole Health System: An Update on VHA Health Care Transformation	The purpose of this series is to further educate non-VA providers and health care teams and give an in-depth review of the whole health system of care, including the elements of the model in action throughout the country, implementation	2 hours	1088250	12/2/2022

	and evaluation strategies, as well as testimonials from Veterans receiving this care. The recorded training will also include a discussion around provision of complementary and integrative health within VHA and in the community.			
Eating for Whole Health: Introduction to Functional Nutrition	The purpose of this knowledge-based educational web course is to inform learners of the latest research in nutrition and draw from the wisdom of dietitians and functional nutrition practitioners throughout VA in order to incorporate nutrition recommendations into Veterans' personal health plans. Learners will explore a number of nutrition-related topics ranging from how food affects bodies at a molecular level, to how best to support Veterans in making changes related to their eating patterns. In addition, this course will introduce a series of whole health tools and techniques and an array of nutrition resources that can support clinical work.	1 hour	1078889	6/30/2021
Whole Health for Pain and Suffering: Neck and Back	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. The program is built around patient vignettes and explores the role of self-care approaches, such as nutrition, physical activity, sleep and interpersonal relationships. Special emphasis is given to mind-body approaches and ways to cultivate mindful awareness. This particular video will discuss whole health for the neck and back.	1 hour	1077809	3/8/2021
Whole Health for Pain and Suffering: Osteoarthritis	This knowledge-based whole health education program is designed to support clinicians who work with patients that experience pain. Participants will learn about evidence-informed, safe and effective non-pharmaceutical approaches to pain care. Veterans and Their Families	clergy, and obtain information on Veterans Health Administration's (VHA) vision to provide appropriate individualized health care to each Veteran in a way that eliminates disparate health outcomes and assures health equity.	1.5	1072717	8/15/2020
Managing Polypharmacy in HBPC Nursing: What does the count have to do with it?	The purpose of this training is to educate HBPC nurses and other healthcare providers to define and bring a better understanding of polypharmacy. The presentation will explain potential negative impacts that polypharmacy can have on our older adults, and provide guidance for identifying interventions that can be used in your daily practice to help prevent or reduce negative outcomes related to polypharmacy.	1 hour	1072871	9/11/2020
Facilitation Tips and Techniques for Whole Health Partners	The purpose of this knowledge-based educational web course is to provide facilitation tips and techniques for delivering face-to-face courses for whole health partners. These techniques will help address training gaps and were designed to augment and provide for opportunities to practice the skills that learners developed in the in-person course, "Whole Health Group Facilitation." The course will help to refresh skills and to overcome challenges that can come up during group facilitation.	1 hour	1072952	9/15/2020
Provider Strategies for Coping with Burnout and Secondary Traumatic Stress	This web-based training will provide psychoeducation, motivation, and brief intervention and implementation strategies for work-related burnout and STS. Learners will be able to define burnout and STS and understand how they differ from general burnout and stress; identify values related to working with PTSD patients; and recall intervention and practical implementation strategies.	1 hour	1071800	7/7/2020

 RESPIRATORY CARE

Veterans Community Partnerships: Strategies and Tools to Revive and Thrive Recording	This webinar topic will bridge the knowledge gap for providers when it comes to resources available to older adults and the discussion practices when dealing with palliative care in older adults. Many providers have expressed a lack of knowledge in palliative care when it comes to resources available outside of the VA and this training was developed to improve their knowledge in coordinated care management when it comes to discussions with Veterans and their surrogate decision makers. Expiring soon!	1 hour	1076507	3/19/2020
Program for Advancing Cognitive Disorders Education for Rural Staff: Addressing Decision Making and Safety in Dementia	Dementia is a major public health concern, affecting over 770,000 Veterans. The incidence of dementia increases with age and most people affected are over the age 60. This course will describe topics related to decision making, advanced care planning, and safety for Veterans with dementia. Specific topics include: competency, capacity, and consent; advanced care planning; driving and dementia; and elder abuse.	1	1075061	11/30/2020
Management of Behavioral Problems in Dementia by the Home-Based Primary Care Team	The purpose of this knowledge-based training is to provide home-based primary care (HBPC) nurses and other staff with a basic understanding of their role in managing behavioral symptoms common among Veterans with dementia. Managing behaviors among patients with dementia can be challenging, and certain behaviors can even pose a threat to the Veteran's safety. As such, common behavioral symptoms among patients with dementia and non-pharmacological interventions for behavior management will be discussed. This information will help close a knowledge gap and provide additional tools for HBPC team members working with patients with dementia and their caregivers.	1	1073219	10/2/2020

Program for Advancing Cognitive Disorders Education for Rural Staff: Treating Dementia Case Studies	Dementia is a major public health concern, affecting over 770,000 Veterans. The incidence of dementia increases with age and most people affected are over the age of 60. It is one of the most costly chronic conditions that VA treats and its financial impact is expected to grow. After identifying dementia warning signs, a thorough evaluation that entails a detailed history, physical exam, lab work and imaging must be done to make a diagnosis. By using this case-based study of two different Veterans presenting with signs of cognitive impairment, health care professionals will fine tune their diagnostic skills. This module will challenge clinicians to apply knowledge learned from previous modules to diagnose and manage dementia.	1 hour	1074076	7/10/2020
Program for Advancing Cognitive Disorders Education for Rural Staff: Normal Cognitive Aging and Dementia Caregiving	Dementia is a major public health concern, affecting over 770,000 Veterans. The incidence of dementia increases with age and most people affected are over the age 60. It is one of the most costly chronic conditions that the VA treats and its financial impact is expected to grow with the increasing number of aging Veterans. This course will describe topics related to decision making, advanced care planning and safety for Veterans with dementia. Specific topics include: competency; capacity and consent; advanced care planning; driving and dementia; elder abuse; and lesbian gay bisexual transgender caregivers.	1	1074570	10/6/2020

SUICIDE PREVENTION

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Veteran Suicide Prevention Resources for Providers	The purpose of this training will be to inform community providers about resources available to them as they treat Veterans at risk for suicide. They will be informed about VA's Suicide Risk Management Consultation program, which is available to community providers and health care teams at no cost. Additionally, they will learn about online resources, tools and training related to topics, such as lethal means safety and postvention support after suicide loss. Expiring soon!	1 hour	1088900	Live event to be held Jan. 23 only

Suicide Prevention- Public Health Model: Lethal Means Safety Education	The purpose behind this one-hour enduring training session is to expose suicide prevention coordinators (SPCs) to lethal means safety measures and increase their confidence when having discussions relating to lethal means. At the end of this session, SPCs and health care teams will have a tactical understanding of how to talk about lethal means, including firearms and gun lock safety, as well as detailed information on how to provide upstream interventions for Veterans.	1 hour	1088698	6/30/2022
Suicide Prevention Partnerships: Caring for Those Who Care for Military Families and Veterans	This recorded webinar will provide education to VA partners, VA employees and subject-matter experts, as well as anyone who supports VA's suicide prevention program and partnerships.	1 hour	1088533	1/2/2022
Suicide Prevention Partnerships: September Is Suicide Prevention Month; Let's Prepare!	This webinar provides education to non-VA mental health providers participating in the Suicide Prevention Month program. Information includes available resources, military/Veteran culture, and clinical resources.	1 hour	1087214	9/30/2021
Assessment and Management of Patients at Risk for Suicide	The purpose of this knowledge-based video program is to educate and assist health care teams to deliver high-quality, evidence-based care. Suicide prevention is a high priority for members of the health care teams who care for Veterans. This video will assist health care teams better understand how the guideline was developed, how to use it and how to effectively assess and manage patients who are at risk for suicide.	1 hour	1087422	10/26/2022
Introduction to Self-Directed Violence Classification System	In less than six minutes, the presenter of this training explains clearly why the adoption of the Self-Directed Violence Classification System is important for clinical practice and research related to suicide prevention. Learners may be surprised that exercise plays a part.	1 hour	1086995	9/2/2022
Self-Directed Violence Classification System – I'm Done	In this eight-minute video, the clinician meets with a young Veteran who has had a recent suicide attempt. The consultant explores the issues of determining suicidal intent, bodily injury and what is meant by "interrupted by self or other."	1 hour	1087003	9/2/2022
Self-Directed Violence Classification System – Going to Bed and Not Waking Up	In this five-minute video, the clinician meets with a Veteran who says she is down and not getting out. The clinician asks directly, "Have you been having any thoughts of suicide or killing yourself?" The Veteran gives an ambiguous answer, and a	1 hour	1086999	9/2/2022

	consultant helps tease out the Self-Directed Violence Classification System.			
Self-Directed Violence Classification System – What Is Self-Cutting	In this scenario, the clinician interviews a Veteran who describes getting mad at his roommate and has thoughts of cutting himself or drinking bleach. The clinician explores how this relates to the Self-Directed Violence Classification System.	1 hour	1087013	9/2/2022
Self-Directed Violence Classification System – Interrupted by Self or Other	In this video, an older Veteran feeling overwhelmed by health issues and a pending divorce decides to drive his car into a ditch as a way to end his life. Before he can act, he is stopped for careless driving. The clinician and consultant unpack all that happens in this session before deciding on the Self-Directed Violence Classification System.	1 hour	1087009	9/2/2022
Self-Directed Violence Classification System – Can We Determine Intent	In this video, a suicide prevention coordinator (SPC) reaches out to a Veteran who has missed an appointment. As the SPC checks in with her, the Veteran brings up burning her arm with a cigarette. In the following supervision session, the clinician is faced with determining intent and what a specific behavior means.	1 hour	1087000	9/2/2022
Self-Directed Violence Classification System – Asking Three Questions to Determine Intent	The Veteran in this vignette is dealing with chronic pain from a back injury. One night, he searches for information on how to overdose on pain medication. With her supervisor, the clinician explores what makes a behavior preparatory and what is intent when it comes to preparatory behavior.	1 hour	1087007	9/2/2022
Self-Directed Violence Classification System – An Accident or Intentional	In this scenario, the clinician interviews a Veteran who witnesses the death of his friend, a fellow Veteran.	1 hour	1087012	9/2/2022
Self-Directed Violence Classification System – After an Inpatient Stay	In this scenario, the clinician interviews a Veteran who has come home from an inpatient hospital stay. The interview highlights the difficulty of transitions and the role of thoughts and behaviors in the Self-Directed Violence Classification System. The Veteran also discusses how he called the Veterans Crisis Line to seek help as part of his safety plan.	1 hour	1087015	9/2/2022
Self-Directed Violence Classification System – Six-Month Follow-Up	In this scenario, the clinician interviews a Veteran who had a serious suicide attempt. The clinician discusses the attempt with the Veteran and tries to place it on the Self-Directed Violence Classification System.	1 hour	1087018	9/2/2022

Self-Directed Violence Classification System – Postvention After a Suicide Death	In this scenario, the clinician interviews a Veteran's daughter about the suicide death of her mother. The clinician discusses how this could fit on the Self-Directed Violence Classification System. Importantly, the video also touches on the need for postvention after a clinician loses a client to suicide.	1 hour	1087179	9/2/2022
Self-Directed Violence Classification System – Does a Gun Always Make It Serious?	In this scenario, the clinician interviews a Veteran about his plans for a long weekend. The clinician checks in about his plans to go to a firing range and asks about thoughts related to self-directed violence.	1 hour	1087017	9/2/2022
Patient Care Services Grand Rounds: Suicide Prevention Overview Within VA	Designed to increase the awareness and overall understanding of public health, this training will provide health care teams with an overview of suicide in the U.S. among both Veteran and non-Veteran populations; review the national strategy for preventing Veteran suicide; provide evidentiary support for public health initiatives; and discuss VA's path forward in leveraging a public health model to prevent Veteran suicide.	1 hour	1086757	8/28/2021
Suicide Prevention Partnerships: How Technology Can Help Veterans Stay Connected	This VA Office of Mental Health and Suicide Prevention webinar will educate VA field employees on how to implement the components of the VA organization's public health approach to suicide prevention.	1 hour	1086666	8/15/2021
Veteran Affairs' Suicide Prevention Strategy	The purpose of this series is to further educate non-VA providers and health care teams about VA policies, practices, expertise, standards and resources for treating Veterans. This recorded session will discuss VA's suicide prevention strategy.	2 hours	1086480	9/5/2022
Treatment Improvement Protocols 50: Addressing Suicidal Thoughts and Behaviors in Substance Abuse Treatment	This interactive web-based training addresses evidence-based treatment improvement protocols for treating substance use disorders. This program will give mental health providers in all disciplines up-to-date, standardized skills assessment training to assess suicidality and develop effective treatment plans to prevent suicide in the Veteran population.	1 hour	1081765	12/31/2021
Treating PTSD and Suicide Risk: Separating Myth From Fact	PTSD is a well-established risk factor for suicidal behavior. Although suicidal thoughts and behaviors are common among patients with PTSD, myths and misconceptions about suicide abound	1 hour	1083785	9/1/2021

	among clinicians. Data that will refute these myths, especially the belief that suicidal patients cannot be safely or effectively treated with empirically-supported trauma therapies, will be presented and discussed in this training.			
Veteran Affairs Suicide Prevention Strategy	The purpose of this knowledge-based series is to further educate non-VA providers about VA policies, practices, expertise, standards and resources for treating Veterans. This particular recorded session will discuss the VA's strategy for suicide prevention.	2 hours	1082085	11/15/2021

GRAND ROUNDS

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Amputation Grand Rounds: Percutaneous Peripheral Nerve Stimulation for Post-Amputation Pain	The purpose of this lecture is to provide an overview on post-amputation pain, including epidemiology, etiologies, risk factors and mechanisms, with special emphasis on service members. During this recorded webinar, health care teams will discuss the evidence for pharmacological and non-pharmacological treatment to include prevention and interventions. Specifically, the participants will review the results of peripheral nerve stimulation in the context of post-amputation pain.	1 hour	1088728	12/8/2021
Amputation Grand Rounds August 2019: Fall Prevention and Techniques for Lower Limb Amputation	The purpose of this knowledge-based presentation is to provide health care teams involved in prosthetic rehabilitation with information regarding fall risks, outcomes and interventions for use in the lower limb amputation patient population.	1 hour	1087588	10/10/2021
Diffusion of Excellence Grand Rounds August 2019: The Gerofit Program and STRIDE Program	During this recorded webinar, presenters will provide an overview of two best practices within VHA that aim to improve immobility of hospitalized older adults: the Gerofit Program and the STRIDE Program. This training will provide an overview of the programs' content, dissemination, program outcomes and return on investment metrics.	1 hour	1087618	9/30/2022
Diffusion of Excellence: The Three Box Solution: A Strategy for Leading Innovation	In this recorded, knowledge-based virtual training, health care teams will be provided an introduction to the three boxes that will enable them to harness the power of each, intensifying the velocity by which we create the future.	1 hour	1088153	10/25/2022

Diffusion of Excellence Grand Rounds: Patient Experience	This knowledge-based webinar will provide an overview of four patient experience domains within the Diffusion of Excellence and VHA. During the presentation, four patient experience coaches will review the 10-4 Campaign, the Hourly Rounding Toolkit, the Take Five Toolkit, the Commit to Sit Toolkit and WECARE Behaviors.	1 hour	1086951	6/18/2022
Diffusion of Excellence Grand Rounds: The Learn, Engage, Act and Process Quality Improvement Training Program	The Learn. Engage. Act. Process. (LEAP) Program is designed to empower the frontline providers by building quality improvement skills within the context of significant constraints on time and resources. During this virtual training, health care teams will learn about the LEAP program and the results so far from 42 teams who have participated.	1 hour	1086958	8/26/2022
Amputation Grand Rounds: Empathic Pain Accuracy	In this training, using Goubert et al.'s (2005) Empathic Pain Accuracy Model, participants will examine the various influences that make perceiving pain as a health care provider or health care team more or less challenging, the importance of this as a skill, and the impact of this ability on patient perceptions and their pain.	1 hour	1086269	8/11/2021
Diffusion of Excellence Grand Rounds: Virtual Blood Pressure Visits	During this recorded, knowledge-based training, presenters will review the VA Video Connect process and best practices associated with this new modality. VA Video Connect is a new modality for delivering patient care into the home using video capable devices and a secure internet connection. Clinicians and health care teams can monitor blood pressure virtually through the use of Video Connect and a VA-issued blood pressure cuff.	1 hour	1086270	8/8/2022
Patient Care Services Grand Rounds May 2019: Understanding Headache Among Veterans	During this knowledge-based webinar, the presenter will provide an overview of the current understanding of headache, including headache associated TBI and such primary headache disorders as migraine and tension headache. Also, health care teams will learn about several exciting new advances in headache medicine and how to access them within VHA.	1 hour	1085719	7/8/2022
Patient Care Services Grand Rounds April 2019: Project HAPPEN	The purpose of this knowledge-based webinar is to discuss prevention of non-ventilator associated hospital acquired pneumonia (NV-HAP) and the innovative nurse led Diffusion of Excellence practice: Project HAPPEN. Health care teams will learn that improving oral hygiene reduces NV-HAP risk saving Veteran lives and reducing health care costs. This will help to close the gap in information in the field	1 hour	1085327	6/2/2021

	pertaining to the correlation between non-ventilator associated hospital acquired pneumonia and oral hygiene.			
April 2019 Amputation Grand Rounds: VA Suicide Risk Identification Strategy	The purpose of this presentation is address risk, screening assessment and treatment in the Veteran population with major limb amputation. The program will describe VA's new standardized suicide risk identification process (Risk ID) and the role of health care teams in Risk ID screening. The program will identify potential implementation strategies for screening and evaluation in amputation care settings and identify important indicators of risk and essential elements of a suicide risk screening assessment.	1 hour	1085410	6/10/2021
Diffusion of Excellence Grand Rounds April 2019: Reducing Hospitalizations by Targeting Interventions at Transitions of Care	During this knowledge-based webinar, presenters will discuss the steps health care teams may take to implement this practice change, resources and barriers, as well as the results achieved by the Coatesville VA Medical Center.	1 hour	1085475	6/11/2022
Patient Care Services Grand Rounds	This presentation connects nutrition and suicide prevention by examining nutrition's role in well-being. The knowledge-based webinar will equip health care teams in basic suicide prevention knowledge, mastery of motivational interviewing and tips that can be utilized to understand if a patient requires further assessment and triage to mental health professionals.	1 hour	1084721	5/5/2021
Amputation Grand Rounds: Management of Dermatologic Issues in Prosthesis Users	The purpose of this knowledge-based recorded training is to develop provider understanding of dermatologic issues Veteran patients may face when using prosthesis. During the training, participants will learn about and discuss common skin issues. Recognition, evaluation, diagnosis and management will be reviewed from a multi-disciplinary perspective to address any gaps in knowledge as well as promote awareness among clinicians.	1 hour	1084868	5/20/2020
Diffusion of Excellence Grand Rounds	This knowledge-based, recorded training will review how facilities can implement new ways of patient dining that are customized for their individual needs, including dining rooms, cafeteria style dining, restaurant style menus and the gold standard room service.	1 hour	1084869	4/23/2022
Diffusion of Excellence Grand Rounds: Light Electronic Action Framework	During this knowledge-based webinar, participants will be provided with information on what the light electronic action framework (LEAF) is and how to obtain a LEAF site. Learners will learn how	1 hour	1084278	3/2/2022

	to incorporate LEAF into their arsenal of tools to support primary processes and functions within their facility or program office.			
PCS Grand Rounds February 2019: Primary Prevention, Secondary Prevention and Prospects for Precision Medicine for Cardiovascular Disease	During this live, knowledge-based webinar, participants will review the epidemiology of cardiovascular disease (CVD) and its risk factors. The presenters will provide a contemporary overview of optimal primary prevention approaches centered on lifestyle (including diet, exercise and weight maintenance) and other primary prevention approaches, including use of aspirin.	1 hour	1084140	3/15/2022
Diffusion of Excellence Grand Rounds January 2019: Transforming the Care of Veterans With Obstructive Sleep Apnea	The presentation will show how innovative applications of new technologies are transforming the delivery of medical care to Veterans with sleep disorders and enabling patients to obtain care without traveling to a medical facility, using video teleconferencing, home sleep testing, wireless transmission of treatment results from the Veteran's home and interactive web-based platforms.	1 hour	1083790	3/12/2022
Amputation Grand Rounds	During this knowledge-based webinar, participants will have the opportunity to review developments in limb transplantation and prosthetic device development, and increase knowledge of shortfalls in traditional approaches to amputation that render them inadequate for today's restorative options. Additionally, new surgical techniques that can be brought to bear in limb amputation and present a new philosophical approach to limb amputation will be discussed. Expiring soon!	1 hour	1083012	2/26/2020
Diffusion of Excellence Grand Rounds December 2018: Hospital-Based 3D Printing in VHA	During this knowledge-based webinar on hospital-based 3D printing, presenters will discuss how VHA is defining use cases, what a quality assurance program looks like, information technology and security challenges that must be tackled, as well as how VHA is preparing to train the next generation of leaders in the emerging field of 3D printing. This webinar will help to close in gap in information throughout VHA pertaining to uses of 3D printing.	1 hour	1083011	2/11/2022
PCS Grand Rounds December 2018: Amputation Care Modernization Through New Service Delivery Models	The purpose of this knowledge-based webinar is to educate health care providers on new amputation care initiatives in VA. The new initiatives that will be discussed include direct scheduling for amputation specialty clinics, utilization of VA Video Connect for prosthesis checkout visits and	1 hour	1082660	1/21/2021

	clinical guidance in the realm of artificial limb fitting. Updates to the VA Amputee Registry and data collection mechanisms will also be included.			
Patient Care Services Grand Rounds November 2018: Hypoglycemic Risk Mitigation	During this knowledge-based webinar, participants will be provided an opportunity to review strategies to prevent hypoglycemia. Shared decision-making will also be discussed. This webinar will promote awareness and increase knowledge associated with hypoglycemia and shared decision-making among VA clinicians, narrowing the gap of information between patients and clinicians.	1 hour	1082212	1/1/2021
Diffusion of Excellence Nov 2018: Celebrating Veterans Month with Veteran-Centered Practices	This training will introduce the VA's My Life, My Story program and the Last Roll Call Ceremony of Remembrance. Participants will have the opportunity to learn how to implement these two programs at their local facilities.	1 hour	1082193	12/14/2021
Diffusion of Excellence Grand Rounds October 2018: Preventing Veteran and Servicemember Suicides	This knowledge-based webinar will review two programs that work to prevent Veteran and Servicemember suicides by utilizing chaplains and mental health providers across VA to reach Veterans at risk for PTSD, mortal injury and ultimately, suicide.	1 hour	1081747	12/12/2021
Amputation Grand Rounds October 2018	The purpose of this live, knowledge-based webinar is to identify and describe key risk factors for musculoskeletal and cardiovascular conditions secondary to lower extremity trauma/limb loss. During this presentation, participants will review effective approaches to mitigate onset and progression of these secondary health conditions, and discuss resources for more information pertaining to these secondary health complications.	1 hour	1081766	11/26/2021
Patient Care Services Grand Rounds October 2018: Optimization of the Clinical Pharmacy Specialist	This knowledge-based webinar will highlight integration of the clinical pharmacy specialists across the VA with a focus on increasing access and quality of Veteran care in primary care, mental health and pain management.	1 hour	1081649	11/28/2021
Diffusion of Excellence Grand Rounds: September 2018	This live, knowledge-based webinar will highlight the different Veteran experience domains that together may positively influence the Veteran experience.	1 hour	1081258	11/12/2021
Amputation Grand Rounds August 2018: VA Amputation Care Initiatives and Updates	The purpose of this live, knowledge-based webinar is to educate health care providers on new amputation care initiatives in the VA. The goals of these new initiatives are to improve access to care, enhance the consistency of care and the timeliness of service delivery.	1 hour	1080939	9/18/2021

Amputation Grand Rounds: June 2018 Session	The purpose of this knowledge-based webinar is to improve provider understanding of the principles and goals of post-operative amputation management following amputation surgery. During the training, participants will learn about the principles and goals of post-operative management, including discussion of the common lower limb and upper limb amputation levels. Strategies to protect the residual limb and prevent contractures will be discussed, as well as various dressings and volume management strategies.	1 hour	1079147	8/14/2020
Amputation Grand Rounds: Management of Dermatologic Issues in Prosthesis Users	The purpose of this live webinar is to develop provider understanding of dermatologic issues Veteran patients may face when using prosthesis. During the training, participants will learn about and discuss common skin issues. Recognition, evaluation, diagnosis and management will be reviewed from a multi-disciplinary perspective in order to address any gaps in knowledge and promote awareness among clinicians.	1 hour	1076456	4/2/2020
Grand Rounds May 2018: Managing Clinician Burnout: An Inter-Professional Case Presentation	This live webinar seeks to provide VA mental health clinicians with an introduction to some fundamental psychodynamic concepts and the clinical techniques they inform which can address, manage and often prevent clinician burnout. Through a case presentation and roundtable discussion, this training will show how these concepts - transference, countertransference and working alliance - provide useful and easily applicable ways to overcome clinical impasses and address ethical dilemmas and painful feelings that are hallmarks of clinician burnout. These concepts enable learners to link the internal with the external phenomena affecting patients' lives while enriching the ability of clinicians to reflect on their professional use of self.	1 hour	1078316	7/8/2020
April 2018 Amputation Grand Rounds: Acupuncture in Amputee Pain Management	This training will identify the adjunctive acupuncture role in amputee pain management and review acupuncture phantom limb pain literature. It will also discuss at least two acupuncture pain management approaches with phantom limb and residual limb pain and explain the amputation rehabilitative process as a part of multimodal, transdisciplinary pain management.	1 hour	1077950	5/25/2020

Grand Rounds March 2018 Enduring: The Science and Practice of Sustainable Eating	This webinar will provide an overview of the science behind and the practice of sustainable eating, in recognition of National Nutrition Month. The training will give special focus to clinical principles for providers to incorporate into their patient education, as well as personal eating practices, to aid in promoting sustainable food and water systems. Other topics to be discussed during this presentation include plant-based diets, processed foods and eliminating food waste.	1 hour	1077312	4/29/2020
Grand Rounds January 2018: VA Telehealth Services Update: Anywhere to Anywhere VA Quality Care	This recorded training will provide an overview of the history of VA telehealth and summary of current activities, as well as a description of national VA telehealth targets and planned activities for fiscal year 2018. This training will give special focus to VA Video Connect, VA's latest software app that enables Veteran patients at home or on the go and/or teleworking VA providers to connect by video using any device for VA quality care. The training will give an update on VA's most recent advancements in regulatory affairs and legislation designed to remove ambiguity for VA telehealth providers and telehealth activity. Expiring soon!	1	1075933	3/1/2020
Amputation Care Grand Rounds: December 2017 Session	The purpose of this training is to develop provider knowledge and understanding of targeted muscle reinnervation (TMR), the patient selection process and postsurgical rehabilitation implications. TMR is the process of harvesting under- or un-utilized nerves following major extremity amputation and transferring them to recipient muscle groups. As an emerging procedure both within DOD and VA, clinicians must be aware of which patients may be good candidates for referral and what the implications are for postsurgical rehabilitation. An evolving body of evidence also supports the use of TMR for management of neuroma-related pain, which has proven refractory to less invasive interventions. Expiring soon!	1 hour	1075176	1/25/2020
VISION				
COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Retinal Cases From a Hospital Setting	This knowledge-based, recorded webinar will focus on retinal cases in a hospital setting. Various ocular conditions will be covered in the context of the hospital	1 hour	1076615	5/18/2021

	setting, to include talc retinopathy, toxic optic neuropathy, commotio retinae and intercranial hemorrhage. Given that these various diagnoses hold systemic and potentially lifesaving implications, eye care providers should be familiar with how these conditions are addressed in a hospital setting.			
Low Vision Telehealth Webcast	With the advent of the various levels of low vision care available at each VA hospital, a need has been created to standardize testing protocols specifically regarding recommendations for telehealth. Due to the different levels of familiarity and background training with low vision providers at each clinic, the following program hopes to establish a guideline to setting up and organizing low vision clinical video telehealth services. This online program will address specialized examination and testing techniques and devices that specifically address problems associated with visual impairment due to diseases such as age-related macular degeneration, diabetic retinopathy and stroke.	1 hour	1077170	4/14/2021
Low Vision and Blind Rehabilitation - Module 1: Introduction	This introductory course provides a historic overview of low vision services along with different service delivery models of low vision clinics. The training provided in this module will help guide providers on how to identify visually impaired patients and how the multiple disciplines can be involved in providing care to them.	2 hours	1073724	1/14/2022
Low Vision and Blind Rehab - Module 9: Clinical Video Telehealth	This training module presents current methods of treating low vision and blind rehab patients through the use of telehealth technologies.	1 hour	1073744	4/3/2020
Low Vision and Blind Rehabilitation: Module 10 – Emerging Technology	The purpose of this knowledge-based educational module is to review and discuss emerging technology, their characteristics and the best use of these devices for the visually impaired. This module will also discuss the use electronic optical devices and optical character readers have increased the functionality and independence of Veterans.	1 hour	1087125	8/29/2022

VETERAN COMMUNITY CARE PROVIDER

Informed and Shared Decision-Making around Smartphone Apps for Clinical Care	The purpose of this lecture series is for researchers and subject matter experts at the National Center for PTSD, Dissemination and Training Division, to provide education and training on research findings relevant to VA clinicians providing mental health treatment to Veterans with PTSD and related concerns, address questions, obtain input from clinician participants, and help close the research-practice gap. This live, virtual, knowledge-based webinar will provide information on informed and shared decision making when using smartphone apps for clinical care. Expiring soon!	1 hour	1089081	Live event to be held Feb. 12 only
Esophagus: Common and Uncommon Case Discussion	This Lunch and Learn live virtual webinar presented at the national level, is intended to provide knowledge sharing, mentoring, peer review and standardization leading to the safety and efficiency for patient care. The important topics for the day-to-day practice, most current topics with the current guidelines and any other topic impacting the patient care and Pathology and Laboratory Medicine will be discussed. Expiring soon!	1 hour	1089011	Live event to be held Jan. 30 only
Life Goals Virtual Training: Training Level 2	The Life Goals Program is an evidence-based self-management skills enhancement program for individuals with mood disorders and related comorbid symptoms. The content of Life	4 hours	1088930	Live event to be held March 20 with additional offerings throughout the

	Goals is modular and based on the needs and priorities of the participant, working in collaboration with their clinician.			year
Veterans Health Information Exchange Community Partner Education	This recorded webinar will provide useful insights on VA's overall health information exchange experience which will benefit other organizations who are working on their own exchange efforts. Additionally, it will provide specific examples and steps of how VA's partners can support Veteran care by engaging with VA in health information exchange activities.	1 hour	1088789	12/23/2022
Helping Veterans Experiencing Homelessness Manage Their Money: A Guide for Case Managers	This knowledge-based webinar seeks to address a knowledge gap on the relationship between money management and homelessness among Veterans and how a targeted intervention can be used to improve skills to achieve financial empowerment and improve housing stability.	1 hour	1088730	Live event to be held Jan. 21 only
Veterans Integration to Academic Leadership: Many Faces of Student Veterans	This training will provide college and university staff the knowledge and skills needed to assist Veterans with transitional issues and needs for mental health assistance through the Veterans Integration to Academic Leadership, or VITAL, initiative.	1 hour	1088530	12/9/2022
Medical Cannabis for Symptom Management: Known and Unknowns	This training will bridge the gap for providers and health care teams when it comes to medical cannabis treatments for older adults. Many providers have expressed a lack of knowledge in medical cannabis use for older adults, and this training was developed to improve providers knowledge with what is currently being used, and to introduce new research on cannabis treatment available to better discuss with Veterans and their surrogate decision-makers. Expiring soon!	1 hour	1088439	Live events to be held Jan. 14 and 15 only
Delivery Order Training – Pharmacist	This knowledge-based web course will provide procurement staff education, training and process information for pharmaceutical delivery order. This will include how the authority has been granted for pharmaceutical ordering officers to utilize the delivery order menu options for the purchase of contracted pharmaceutical items, such as the seasonal influenza vaccine.	1 hour	1087954	6/1/2022

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
Meeting the Fiduciary Needs of Vulnerable At-Risk Veterans	The purpose of this web-based program is to strengthen the knowledge of the VA Fiduciary program and processes to enhance communication and collaboration between VHA social work and VBA Fiduciary Service. The improved access, communication and enhanced collaboration are expected to lead to elimination of delays in the fiduciary processes that create negative clinical outcomes for at-risk Veterans.	1 hour	1087215	8/29/2022
Partnering With Communities for Safe Firearm Storage	This recorded webinar will provide education to non-VA mental health providers participating in the Safe Firearm Storage program. Information will include available resources on military/Veteran culture, training opportunities and clinical resources.	1 hour	1087336	10/15/2021
Using 2237 to Purchase Pharmaceuticals	This training provides ongoing, on-demand training for current and future pharmacists and procurement staff on how to complete a 2237 form of procurement to ensure that purchasing of pharmaceuticals is conducted legally, safely and judiciously.	1 hour	1086978	8/21/2022
Veteran Service Organization National Service Officers Training on MISSION Act	This purpose of this knowledge-based web series is to give Veteran Service Organization (VSO) national service officers a more detailed understanding of how MISSION Act implementation will impact Veterans receiving health care in VA and the community.	1 hour	1086692	6/6/2020
Drug Enter/Edit: Special Cases	This training will educate on creating local drug file entries for special cases and discuss how to enter an investigational drug, how to create a brand-specific entry and how to create a half tablet entry for the unit dose package. Lastly, it will cover how to have different dosages for inpatients and outpatients, with warfarin as an example, and explain how to manipulate the drug file to provide options to assist in formulary management.	1 hour	1086071	12/1/2021
Drug Enter/Edit: Editing Drug File Entries	This course educates on how to make basic edits to current drug file entries including how to inactivate drugs and make drug accountability edits.	1 hour	1086070	4/1/2022
Whole Health Coaching: Tracking Mechanisms	This program will focus on stop codes, CHAR4 codes, and health factors associated with whole health coaching. It	1 hour	1085561	7/3/2022

OTHER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	also focuses on the differences between count and non-count clinics and how to apply to whole health coaching and what service lines coaches could be hired.			
Pharmacy Orderable Item	This course will educate pharmacists on the proper maintenance in ensuring medications are ordered and delivered in a safe and efficient manner. This module discusses how to match a new drug or supply entry to a new orderable item, how to create a new orderable item and how to match a new drug/supply entry to an existing orderable item. This module also covers how to mark an orderable item as high risk/high alert and how to link an associated immunization.	1 hour	1077641	3/1/2021
Entering a New Drug Into the Local Drug File	Drug files are part of an extremely complicated database that interfaces with the Computerized Patient Record System or CPRS and are an integral part of medication orders and the management of medications and supplies within VA facilities. This module will give VA staff the tools to correctly enter a new drug into the database and to update those currently in the databases ensuring medication safety to Veteran patients.	1 hour	1077623	3/1/2021
Marking a New Drug for Pharmacy Packages	The drug files are part of an extremely complicated database. These files are an integral part of medication orders and the management of medications and supplies within the facility. This course will educate on the proper maintenance that is essential to ensure that medications are ordered and delivered in a safe and efficient manner. This module discusses what application packages are available, explains how to mark a drug/supply for each application package and explains the relationship between VistA drug enter/edit and the Computerized Patient Record System or CPRS.	1 hour	1077642	3/1/2021
Computerized Patient Record System Tab by Tab: A Basic Orientation	This training covers the basic aspects of using the VA Computerized Patient Record System (CPRS). Learners will experience each tab of the CPRS, basic operations and how they may customize settings to make more efficient use of the system. It will equip the new employee with the skills necessary to navigate the electronic health record and provide existing	6 hours	1078082	5/15/2021

OTHER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	employees ongoing training and job aids they can use to build their CPRS skills while working in their professional capacity. The modules in this course may be completed in any order and may be completed at different times.			
Empowering Patients in Chronic Care: Behavioral Health Coaching for Diabetes Management	This application-based training is to address a gap in targeted, patient-centered goal-setting skills among diabetes care staff in VHA primary care. Upon completion, participants will use awareness of patients' values and care priorities to personalize feedback, prepare self-management goals and action plans, and, ultimately, improve clinical and patient-centered outcomes.	2.25 hours	1086711	6/30/2022
Applying Therapeutic Communication: Enhance Patient Care Through Engagement and Building Trust	The purpose of this knowledge-based webinar is to initiate and/or improve therapeutic communication (verbal/non-verbal) and engagement skills by health care staff to enhance Veteran trust, and develop therapeutic rapport, especially with those who may be experiencing suicidal ideation.	1.5 hours	1080603	9/17/2021
Rehabilitation Nursing: Therapeutic Communication Training and Crisis Intervention	Rehabilitation nurses on polytrauma/spinal cord injury units (SCI) care for high suicide risk Servicemembers/Veterans. Nursing staff on polytrauma/SCI rehabilitation units are challenged to understand varied patient responses, and novice nurses may have little experience in caring for patients with these challenges. This webinar will work to close the knowledge gap that exists among rehabilitation nurses and provide strategies establishing a therapeutic alliance with this high-risk Veteran population.	1 hour	1078740	7/9/2021
VA Telemental Health Innovations 2019: Enhancing Veteran Access to Care	The purpose of this series is to further educate non-VA providers about VA's policies, practices, expertise, standards and resources for treating Veterans. This particular session will discuss telemental health innovations.	2 hours	1084106	4/22/2022
Emergency Management: Are You Resilient?	This virtual knowledge based training will provide an overview of the four fundamental cornerstones of emergency management planning, in addition to pointing out that all plans are based on six assumptions that are often	1 hour	1079365	7/25/2020

OTHER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	untested. Based on the literature, untested assumptions have led to failures and delay in the overall response efforts. Participants in this training will be better prepared to identify the obstacles to multi-event emergency management planning.			
Home Based Primary Care: Veterans With Obesity: Addressing Mobility Challenges Together	The purpose of this training is to educate Home-Based Primary Care (HBPC) nurses and other health care providers about the care of elderly Veterans with obesity who have mobility challenges. This presentation will discuss various aspects of mobility issues in the home for Veterans with obesity, including related complications, resources for assessment, risk of injury and equipment to improve mobility and safety.	1 hour	1081125	6/25/2020
Home-Based Primary Care: Chronic Kidney Disease for the Non-Nephrologist	The purpose of this training is to educate home-based primary care (HBPC) nurses and other health care providers about the care of elderly Veterans who are at risk for or who are currently diagnosed with chronic kidney disease (CKD). The presentation will discuss various aspects of CKD, including risk factors; strategies to slow progression of the disease; complications; symptom management; and the importance of advance care planning for Veterans with CKD who are not candidates for renal replacement therapy.	1 hour	1081123	6/25/2020
VA/DOD Clinical Practice Guideline for Stroke Rehabilitation	The purpose of this knowledge-based video program is to educate members of the health care team on key principles of the 2019 VA and DOD Stroke Rehabilitation Clinical Practice Guideline. This training program will provide important information that will assist the health care team to deliver high-quality, evidence-based stroke rehabilitation care.	1 hour	1086777	9/26/2022
Balancing Competing Priorities in Home Based Primary Care	Veterans being cared for in home-based primary care (HBPC) programs throughout the country are some of the most seriously ill Veterans with the greatest number of comorbidities. In addition, these Veterans' functional status is often highly limited. Given that most clinical guidelines and educational programs focus primarily on single diseases, clinicians often have difficulty balancing	1 hour	1081039	6/25/2020

OTHER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	the multiple medical and psychosocial care needs of this population of Veterans. This program will address both the decision-making process and the medical care behind prioritizing Veteran-centered care outcomes and health and wellness-centered outcomes.			
Mandatory Internal Control Training	This program provides mandatory training required by statute for all chief executive officers and key personnel of nonprofit research corporations that are partnered with VA medical centers.	1 hour	1081139	7/28/2020
Two-Step Clean	This task order will support the development of a frontline staff-based learning product as part of an integrated curriculum plan to address VHA Environmental Management Service's two-step cleaning process training requirements. This learning product will provide a readily accessible, cost-effective educational tool to reinforce the two-step cleaning process and provide personalized instruction through mentor feedback within the microsimulation.	1 hour	1081269	10/26/2021
Clinical Practice Guideline: Pregnancy	Delivering high-quality, evidence-based care is a priority for both VA and the Department of Defense. The purpose of this practiced-based video program is to provide important information to members of the health care teams that will assist to improve the care that they deliver to pregnant women. There are many variables to consider when caring for a pregnant woman. This video will help the health care teams to better understand how the guideline was developed and which interventions are supported by evidence.	1 hour	1081790	11/5/2021
Diabetes Medications and Complications	This course provides a basic overview of common diabetes medications and complications for the novice learner. VA/DoD guidelines as well as other government site resources are provided to help educate patients about their diabetes.	1 hour	1088759	12/1/2022
Shared Decision-Making: Diabetes Self Management Education and Support	This training supports the Health and Human Services Directive that recommends the Office of Disease Promotion improve the coordination of Federal education on diabetes. It will provide learners with information	1 hour	1087037	4/8/2022

OTHER

COURSE TITLE	DESCRIPTION	CREDIT HOURS	COURSE ID	EXPIRATION DATE
	regarding shared decision-making concerning diabetes self-management education and support.			
Diabetes Nutrition Counseling	This training is on the Health and Human Services Directive that recommends the Office of Disease Promotion improve the coordination of Federal education on diabetes. It will discuss proven reference information that outlines the Commission's recommendations on nutrition counseling skills that are needed when nurses and dietitians are working with patients with diabetes.	0.75 hour	1087036	6/27/2022
Patient Safety in Diabetes for the Inpatient Nurse	This training aims to improve risk assessment, prevention and critical thinking skills of licensed vocational nurses (LVNS), licensed practical nurses (LPNS) and registered nurses (RNS) to provide nursing strategies for optimal diabetes care for hospitalized patients to improve outcomes.	2 hours	1082155	1/1/2022
Emergency Medicine Chat: Alternative Pain Management	This live, recorded webcast will address pain management and whole health approaches for treatment in the emergency department, as well as effective strategies to help Veterans achieve greater and longer lasting relief from pain using non-traditional medical approaches.	1 hour	1086997	8/13/2022
EMchat: Treating Geriatric Patients in the Emergency Department	Clinicians with various specialties in specialty care and primary care are placed in VHA Emergency Departments (ED) and expected to perform emergency medicine functions on a whim, without becoming acclimated to emergency medicine clinical policies, procedures and practices. Practicing emergency medicine without ED training increases liability of VHA ED and urgent care facilities. This training will focus on working with geriatric patients.	1 hour	1082934	1/31/2022
Basic Safe Patient Handling and Mobility Training for VA Employees	The purpose of this knowledge-based Safe Patient Handling and Mobility educational program of best practices is to support safety for all VA staff and patients, as well as increase improvement of patient-centered care.	1 hour	1083300	7/9/2021
Basic Safe Patient Handling and Mobility Training for Direct Patient Care Providers	The purpose of this knowledge-based Safe Patient Handling and Mobility educational program of best practices is to support safety for all VA staff and patients, as well	1 hour	1083299	7/9/2020

	as increase improvement of patient-centered care.			
PsychArmor Institute Military Sexual Trauma Course	This course provides information about military sexual trauma, (MST) which is sexual assault or sexual harassment during military service. After reviewing the course, learners will be able to define MST; describe the health and general impact of MST on Veterans' lives; screen Veterans for MST; and describe the MST-related services available from VA.	1 hour	1084802	5/31/2022
Prevention of Amputations for Veterans Everywhere	VA's Prevention of Amputation in Veterans Everywhere (PAVE) program provides care and treatment to patients who are at risk of foot disorders that can lead to more serious conditions. This web-based course is designed to train clinicians to conduct basic foot screenings and to prevent lower extremity complications and amputation.	1 hour	1085184	12/20/2020
Interdisciplinary Approach to Optimize Resources in Assistive Technology	To achieve Veteran access to assistive technologies (AT) and the associated outcomes, clinical staff need collaboration with the interdisciplinary team members, and must have the knowledge, skills and ability to optimize access and apply resources. This knowledge-based recording is aimed to fill the knowledge gap regarding AT application in rehabilitation among health care team members.	1 hour	1085194	6/21/2021
